

ALL ABOUT BLOOD:

TOP RESOURCES ON HEMATOLOGY & BLOOD HEALTH

[Hematology Research & Organizations](#) | [Hematology Journals & Publications](#)
[Blood Disorder Organizations](#) | [Blood Banks & Donation Resources](#) | [Additional Information](#)

The blood in our bodies, just like any other major part of our health system, can be affected by diseases and disorders. Hematologists study blood and the conditions that affect it to better understand how to keep it healthy. Research into the nature of blood has allowed blood, platelet, and plasma transfusions to become a common part of the treatment process for ill and injured patients. Additionally, blood research has uncovered new knowledge about certain types of cancer, bone disease, and other afflictions. The importance of hematology and the study of blood disease cannot be overstated. Also important is the large system of blood donation clinics and donors that provide blood for research and medical use.

Even for [medical professionals](#) who aren't hematologists, it is important to maintain up-to-date knowledge of practices regarding both treatment of blood disease and using blood as a treatment for other conditions. We gathered here some of the most informative and cutting edge resources on hematology and blood health. This isn't a ranking of which sites are "best," but rather a compendium of the most authoritative sources on various aspects of the overall system of blood use and blood research.

Hematology Research & Organizations

Hematologists study all types of blood diseases and disorders as well as examining the functions blood has in healthy bodies. Hematologists are frequently involved in [cancer research](#) as well because of the tight link between blood disease and some cancers.

MastersinNursing.com

American Society of Hematology

Helping hematologists conquer blood diseases worldwide

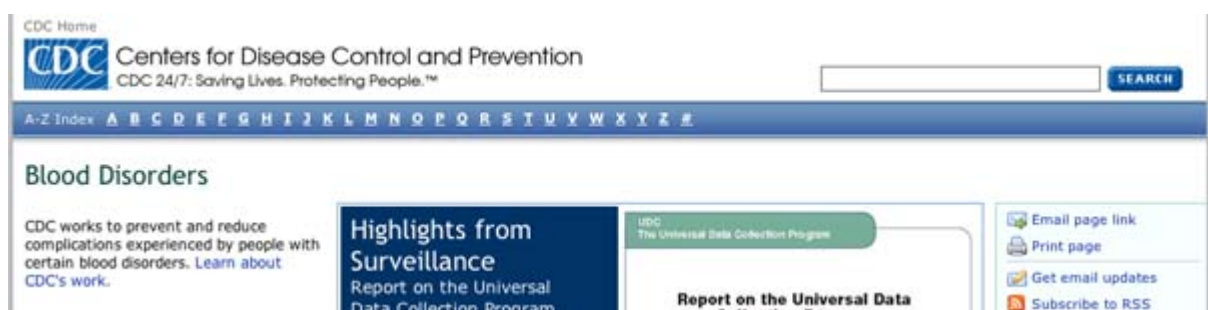

The American Society of Hematology brings together hematologists from across the world, over 15,000 in total, to further the profession and enhance treatment and understanding of all aspects of how to better serve patients.

2. International Society for Laboratory Hematology

The International Society for Laboratory Hematology promotes the agenda of laboratory professionals focused on hematology research and clinical studies. Since their founding in 1992, they've made large strides for individuals with the condition by giving professionals a useful network to work in.

3. CDC: Blood Disorders

The Centers for Disease Control and Prevention has an extensive section on blood disorders and the content is designed to inform individuals who have little to no grasp on the information previously.

4. NCBI: Blood Groups and Red Cell Antigens

MastersinNursing.com

NCBI: Blood Groups and Red Cell Antigens breaks down the different blood types and interesting blood transfusions related to pregnancy. The eBook breaks content down into smaller, more understandable portions and emphasizes readability while not sacrificing quality.

5. Children's Hospital of Pittsburgh Hematology/Oncology Research

Children's Hospital of Pittsburgh Hematology/Oncology Research details some of the ways to address childhood cancer death by identifying the most effective clinical approaches. The site also breaks down an impressive variety of material into many different research pages.

6. European Hematology Association

The European Hematology Association brings together researchers to push the field of hematology forward. The organization hosts an annual congress, provides educational support, and advocates for hematology related activities in Europe and abroad.

7. Hematology/Oncology Pharmacy Association

MastersinNursing.com

[ABOUT](#)
